Leave fully extended.

Add Absorbent Core

Waist Adjustments to Fit All Four Sizes

To close waist, use corresponding snaps or hook-and-loop closure for a snug fit.

Customize the absorbancy as needed.

Tiny Tush Tips!

First Use:

- ✔ The pocket diaper should be washed before using. To extend life of the pocket, hang to dry.
- ✔ Wash and dry inserts until they reach their maximum absorbency.

Washing:

- ✔ When soiled, remove solids prior to washing.
- ✔ Separate insert from the diaper and store in a dry pail.
- ✔ Always rinse soiled diapers in cold water.
- ✔ Use 1/4 the suggested detergent amount and add an extra rinse cycle when heavily soiled.

Machine Wash Hot
 Non-Chlorine Bleach
 Tumble Dry Low
 Hang Dry
 Do Not Iron • No Fabric Softener

elite pocket diaper care

To ensure complete cleaning of your pocket diapers, wash Tiny Tush Elite pocket diapers using the

highest water level in your washing machine. Wash using any water temperature with one-quarter of the recommended amount of detergent. Using too much detergent produces build-up and is the single most common cause of most odor and leaking problems. Build-up can also cause rashes.

Avoid detergents with perfumes, dyes, and fillers that can build up on the fleece, as they may cause leaks. A simple cleaning agent, such as washing soda, works best and can be found next to the color safe bleach. If the diapers smell stinky or like detergent, wash them again with less detergent and more water.

- ✔ Avoid fabric softeners and dryer sheets as they leave a coating on fabric causing diapers to leak. If they are used in your machines for other laundry, they will coat the inside of your machines and transfer the coating to the diapers.
- ✔ Avoid using diaper cream. If you find that you need to use a diaper cream, use a barrier such as disposable diaper liners to prevent staining of the diapers.
- ✔ For a trimmer fit on newborn babies, substitute the small absorbent insert with cotton wash cloths.
- ✔ When adding new hemp or cotton items to your diaper stash, be sure to wash them separately until they are completely primed, preventing the natural oils from transferring to pocket diapers or diapers already in use.
- ✔ To prevent Velcro® or Aplix® closure diapers from tangling and to reduce the lint build-up in the tabs, be sure to fasten the fold-back tabs prior to laundering.
- ✔ By adding an extra spin cycle to the washing cycle and adding a clean dry towel to your dryer, you can reduce the drying time up to 25%. Line dry diapers to save on drying cost.
